Comments:

State licensure in Respiratory Care (RC) is required in forty-nine states. Alaska does not have an RC licensing law. All forty-nine states require completion of a CoARC accredited RC program (such as LCC Respiratory Care Program) and Respiratory Therapy credentialing. Upon graduation from a CoARC accredited program graduates may earn their Respiratory Therapy credentials by passing the requisite board exams administered by the National Board of Respiratory Care (NBRC).

Program applicants should consult with state licensing agencies to determine state licensure requirements. State licensing contacts are available at: <https://www.aarc.org/advocacy/state-society-resources/state-licensure-contacts/>
